TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java (Basic), C/C++, HTML, CSS, SASS.

Frontend: React.js, React Native, Micro-Frontends, Module Federation, SSR, Code-Splitting, WCAG Accessibility.

Testing: Jest, Playwright, React Testing Library, Unit/Integration Testing.

Tooling/Build/CI-CD: Git, GitLab CI/CD, Webpack, Vite, Babel, NPM, JIRA, Figma, Postman.

AI & Monitoring: Claude Code, GitHub Copilot, Real User Monitoring (RUM), Kibana, Google Search Console, Google Analytics.

EXPERIENCE

InfoEdge India Ltd - 99acres

Dec 2024 – Present

Senior Software Engineer

Noida, Uttar Pradesh

- Revamped the project detail page by developing a new **Properties Tab in React Native** for mobile site and apps, with advanced filtering and rich UI components, resulting in a **5% increase in CTR** and **8–10% improvement in user session duration**.
- Completely revamped **Project Tuples** on search pages by creating a **reusable carousel component** with support for images and seamless **video playback** — viewport-aware play/pause as cards move in and out of view, along with auto-carousel — resulting in a **17% increase in CTR**.
- Optimized app load time by **40%** through re-architecting the API call flow, enabling a **backend-for-frontend** pattern to defer non-critical data, and introducing component-level **lazy loading** and pagination improvements.
- Created a **design system** of common, reusable frontend components adopted across 99acres, documented and made accessible to other teams via **Storybook** — ensuring UI consistency and accelerating cross-team development.
- Contributed to the **micro-frontend architecture** using **Webpack Module Federation**, decoupling feature modules into independently deployable units with shared component libraries — reducing cross-team dependency resolution time by **30%** and enabling **2x faster** feature release cycles across 3+ teams.
- Ensured **WCAG 2.1 AA accessibility compliance** across key user journeys by applying shift-left accessibility practices — semantic markup, ARIA attributes, keyboard navigability, and contrast-safe UI — resolving **90+ accessibility violations** and improving Lighthouse accessibility score from **72 to 96**.
- Continuously improved **CI/CD build pipelines** through bundle-size analysis, code-splitting, tree-shaking, and dependency optimization, reducing build times and page load times while eliminating manual release errors.
- Engineered **backend service integrations**: connected upstream services, designed API contracts, and introduced **caching with asynchronous refresh**, reducing redundant API calls by **35%** and cutting average response latency by **50ms** while maintaining near real-time data consistency.

IndiaMart InterMesh Ltd

Feb 2022 – Nov 2024

Software Engineer (incl. 6-month internship)

Noida

- Implemented **Real User Monitoring (RUM)** capturing Web Vitals of real users; achieved a **55% improvement in Interaction to Next Paint (INP)** and moved **8 million poor-INP URLs into the Good zone**; delivered a technical session on RUM to a **300+ audience**.
- Optimized page-to-page journeys via **lazy loading, code splitting, and Chrome profiling**, offloading heavy computation to **Web Workers** — freeing the main thread and moving **200K First Input Delay URLs into the Good zone**.
- Built **SSR-based Company Card and Top Product widgets**, boosting SEO and initial render speed, and improving the Company Page's **LCP score by 20%**.
- Awarded **“Best Performer of the Month”** for September 2023 and January 2024.

EDUCATION

Harcourt Butler Technical University

2018 – 2022

B.Tech., Computer Science and Engineering — CGPA: 8.0

Kanpur, India

ACHIEVEMENTS

- 4★ on CodeChef.
- 600+ problems solved across coding platforms.
- Secured 472nd rank in Scaler EDGE APEX 2021 — [Link](#).
- Secured 269th rank in CodeChef May Lunchtime 2021 among 5500+ candidates.
